Upon further consideration of the 12/13/04 Appeal Brief and updating the search, new rejections should be made and a new reference has been found.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 72,77,80-85,87,89,90-91 and 98-99 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 5,225,325 in view of Mazza et al (USP 4,815,978).

See the appropriate paragraph of the 12/11/03 final rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 72,77,80-85,87,89,91 and 98 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Mazza et al. (USP 4,815,978).

See paragraph 5 of the 3/19/03 non-final Office action.

The Office has reconsidered this rejection under 35 USC 102(e) in light of the remarks the instant application has support for a 3/2/90 filing date in the earliest parent application. Further, the specification does not give any guidance on the sources of the claimed "tissue". The Office is taking the position that blood, as taught in column 5 lines 2-3 of Mazza et al., is a tissue sample and has been properly read on the instant claims.

Claims 72,77,80-85,87,89,90-91 and 98-99 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DiMaggio et al.

DiMaggio et al. teach a method of automatically staining a tissue sample on a slide with a series of stains and buffers. The Office is reading the taught stain on the claimed reagent. Column 6 lines 56+ teach blower(66) directs a gentle stream of air

over the slides to assist in the mixing of the components. The air stream is gentle enough not to disturb proper staining.

Response to Arguments

In the 12/13/04 Appeal Brief Applicants stated the primary reference Miller et al. was not available as prior art because the instant claims are supported by the disclosure of the earliest parent application 07/488,601. Applicants stated they attached a copy of the 07/488,601 specification to the appeal brief. The attached "evidence appendix" did contain a specification, but no serial number to corroborate it to 07/488,601. The Office assumes the attached specification is that of 07/488,601. The Office has also ordered the parent file 07/488,601. It would be helpful if Applicants could supply a copy of 07/488,601 specification that has identification corroborating it to 07/488,601.
